**Description :**

Working Model of Electronic Ignition System

**Features:**

- Demonstration model consisting of actual components used in Automobiles.
- Visualization of Spark & Firing order.
- Electric motor for driving the distributor.

WAS-02
is a working model designed to demonstrate the students operation of a typical electronic ignition system used in cars. The trainer consists of a Ignition coil, distributor, set of spark plugs & 12 V DC power supply. The components used are from actual autmobile petrol engines (Make - TATA / Maruti). In order to show the spark generation & firing order, the distributor is driven by a low speed electric motor.

**System Components**

Ignition coil

Distributor

Set of Spark Plugs

12 V DC Power Supply

Electric motor
