Product Name:

2-Input Digital Multiplexer for Vocational Training and Didactic Labs

Product Code:

ETKN-31

Description:

Equipment for Education, Engineering and Vocational Training - 2-Input Digital Multiplexer - Computer Logic Training Board has been designed specifically for the study of 2-Input Digital Multiplexer. The technique of multiplexing is frequently used where a number of digital signals are to be processed simultaneously or sent together over a significant

distance to minimizes the number of circuits or communication channels. The board is absolutely self contained and requires no other apparatus.

OBJECT - To study the operation of a 2-Input Digital Multiplexer.

FEATURES - The board consists of the following built-in parts:

- 01. + 5V D.C. at 50mA, IC Regulated Power Supply internally connected.
- 02. One Digital Multiplexer IC.
- 03. Three switches to set the data and control bits.
- 04. LED for visual indication of selected channel.
- 05. Adequate no. of other Electronic Components.
- 06. Mains ON/OFF switch, Fuse and Jewel light.
- * The unit is operative on 230V ±10% at 50Hz A.C. Mains.
- * Good Quality, reliable terminal/sockets are provided at appropriate places on panel for connections / observation of waveforms.
- * Strongly supported by detailed Operating Instructions, giving details of Object, Theory, Design procedures, Report Suggestions and

Book References.
