

Product Name :

8051 Development Board for Vocational Training and Didactic Labs

Product Code :

EBOARD0003

**Description :**

8051 Development Board Equipment for Education, Engineering and Vocational Training - - 8051 Development Board is fully contained board, suitable for programming 8051 controllers as well as for designing and testing of 8051 projects. This development board includes an on-board programmer providing an interface between the micro-controller and PC. You are simply expected to write your program in any one of 8051 compiler, generate a “*.hex” file and program your micro-controller using the on-board programmer. The 8051 Development Board contains many devices like 16X2 LCD, Seven Segment Display, LED, 4X4 Matrix Keyboard, I2C I/O Expander, RTC, ADC, DAC, Relay, Stepper Motor etc. that conveniently interface with the micro-controller and allow you to easily simulate the operation of the target device.

- **8051 Development Board**
- **RS232 Serial Cable for Programming and Interfacing with PC**
- **Product CD with Programming Software and Examples and Experiments**
- **Product Manuals and Schematic Diagram of the Board.**
