Product Name : ABS Simulator - Electrical	Product Code : TechnicalLab0466
Description :	
ABS Simulator - Electrical	
The electrical ABS Simulator was created to show how an ABS in a moder space as it sits on a table-top and allows you easily:	n car operates. The simulator saves
Educate about how ABS operates in fully functioning condition or with multiple faults and disconnections.	
• Instruct on how to detect low fluid level, measure pressure and different control signals, how a hydraulic ABS valve operates, how brake systems work, and more.	
Introduce your students to self-diagnostic control and fault diagnosis process.	
Access theoretical and practical study in the educational manual provided	l.
EXPERIMENTS:	
How ABS Operates:	
- with one wheel speed sensor disconnected	
- when wheels are rotated at different speeds	

Phone: +91-0171-2643080, 2601773 Email: sales@naugraexport.com

Naugra Export	
Fault diagnosis process	
Self-diagnostic control	
How Hydraulic ABS valve operates	
- when there is leakage	
- when the electronic brake unit is disconnected	
How brake system works:	
- different control signals in the ABS system	
- pressure during operation	
How to measure:	
- low fluid level	
How to detect:	
- with different relative speed turn of wheels	
- with hydraulic valve stuck	
- with destroyed hydraulic valve	
- when wheels are rotated at same speed
