

Product Name :
Absorption In Wetted Wall Column

Product Code :
ChemicalMT-10003

Description :

Floor standing apparatus for demonstrating and measuring liquid film mass transfer coefficients. Oxygen is absorbed from air into deoxygenated water, and the two columns needed for that work stand side by side in a painted steel framework: a wetted wall column of glass, 900mm long and 32mm internal diameter, and a deoxygenating column of clear acrylic, 1570mm long and 26mm internal diameter. The wetted wall column is gimbal mounted so it can be set accurately vertical.
