

**Product Name :**  
Air Entrainment Meter For Testing Lab for Aggregate Testing Lab

**Product Code :**  
NATM-M8

**Description :**

Air Entrainment Meter for Aggregate Testing - Entrainment of a small amount of air in the cement concrete has been found to improve considerably the durability of concrete. Further, when use of admixtures is made to increase workability of concrete, a check of the air content is required to ensure that the percentage of air remains between 1 to 2% to get the optimum performance of the concrete structure. Air Entrainment Meter is having a capacity of 0.005 m<sup>3</sup> (5 Liters), suitable for aggregate size upto 38mm. Each air entrainment meter is supplied complete with a calibrating cylinder, pressure gauge, funnel, measuring jug, straight edge and a hand pump.
