

Product Name :
Alternator

Product Code :
NJC0029

Description :

Alternator

Technical Specification :

2. Voltage: DC 12V

3. Pulley type: V-belt

Car Alternators / Auxiliary Alternator - The offered range of product is widely acknowledged across the industry for their high performance and quality. These products are made using optimum quality components using the advanced tools and technology at vendors end. Apart from this, we are offering these products at pocket friendly price within the committed time frame. The Alternator Trainer is in fact a simulator that allows instructors to demonstrate the operation of automotive charging systems with external voltage regulation. The synoptic diagram and the layout of all the control and instrumentation units provide clear and simple operation to the user. The trainers are very reliable and equipped with all safety equipment required for demonstration. The trainer contains an alternator, a driving motor, a drive belt, a battery terminal block, a voltage regulator and the associated wiring. The charging system is a circuit with the battery wired in parallel. After the engine is started and running, the alternator takes over as the source of power and the battery then becomes part of the load on the

charging system.

Features:

Various specification

Longer life

High performance

Alternator

1. Amperage rating: 100A

2. Voltage: DC 12V

3. Pulley type: V-belt
