

Product Name :
Alumina Grinding Ceramic Ball India

Product Code :
NG354

Description :

Alumina Grinding Ceramic Ball India

Technical Specification :

- Wear-Resistant alumina ball is a high-quality grinding medium made of selected high grade materials, advanced molding technology and calcined in high-temperature tunnel kiln. Possessed with high density, high hardness, low wear, good seismic stability and good corrosion resistance, the products are the most ideal medium for grinding glaze, blank and mineral power processing, and are used as the grinding medium of ball mill in ceramics, cement, paint, refractory, inorganic mineral power and other industrials.
- Type: Alumina grinding ceramic ball
- Material: 92% min. (A12O3)
- Shape: Spherical and round
- Diameter: 10 mm
- Color: White
- Bulk Density: 3.6 g/m3 min
- Moh's hardness:9

- Water Absorption: 0.02% max
