

Product Name : Andrade Indicator	Product Code : NECHEMICAL-L3002017
Description :	
Andrade Indicator	
Technical Specification :	
<p>Andrade Indicator is a solution of acid fuchsin which when titrated with sodium hydroxide changes color from pink to yellow. It is also used to differentiate microorganisms on the basis of carbohydrate fermentation in broth as well as agar media. Andrade Peptone Water and CLED Agar with Andrade Indicator are commonly used broth and agar media respectively. It becomes pink at acidic pH level (pH 5.0) and yellow at alkaline pH level (pH 8.0).</p>	
Grade: pH Indicator	
Capacity: 125 ml	
Ingredients	
Acid fuchsin: 0.5 gm	
1N Sodium hydroxide: 16.0ml	
Distilled water: 984.0ml	
Quality Control	
Appearance: Light yellow to brownish yellow coloured liquid.	
Clarity: Clear without any particles.	
Reaction: It becomes pink at acidic pH levels and yellow at alkaline pH levels (pH range 5 - 8).
