

Product Name :
Asphalt Concrete Mix Design - Marshall Method

Product Code :
NCC0017

Description :

Asphalt Concrete Mix Design - Marshall Method

Technical Specification :

Objective:

The objective of this experiment is to expose students to the process of optimizing asphalt concrete mix used for highway construction as part of mix design process.

In this test, the students will carry out the Marshall tests for stability and flows of asphalt for specimens prepared in Experiment No. 6 and thus determine the effect of asphalt content on stability and flow.
