

Product Name :
Blood Bank Refrigerator

Product Code :
NLBY-E2

Description :

Blood Bank Refrigerator - Blood Bank Refrigerators designed to conform AABB criteria, CE marked and UL listed. These Blood Bank Refrigerators are available in standard sizes and custom made. Bionics Blood Bank fridge units offer precise temperature control and meet all industry standards for reliable blood storage. Highly efficient refrigerators for blood storage are available in standard models and can also be designed and manufactured matching to specific requirements of the customers. Blood bank refrigerators are designed to keep in mind the need of highly safe blood storage and available in small and large sizes including compact, benchtop and upright designs. Come up with robust design and technically fit, Blood Bank Fridges from Bionics Scientific are top quality medical refrigerators that require minimum of routine maintenance while performing high quality blood storage.

Blood Bank Refrigerator Features:

- Conform to AABB criteria
- Precise temperature control
- Digital alarm and control system
- Blood audit interface
- Compact, benchtop and upright designs
- Durable construction and long lasting performance
- Automatic off cycle defrost
- Full range of optional accessories
- Minimized cold air loss
- Solid and glass doors
- 7-day circular chart temperature recorder
- Adjustable stainless steel drawers
- Fluorescent interior lighting with on /off switch

- Features and specifications can be customized
- Excellent after sales service
- UL and CE Mark Listed

Blood bank refrigerators often called Blood Bank Fridges you get precise temperature control for reliable blood storage. With digital controls and stainless steel construction these medical refrigerators are designed in small and large sizes. Available in one-, two-, and three-door units, the Auto Defrost Blood Bank Refrigerator models offer heavy-duty, standards compliant blood bag storage.

Temperature:

Blood Bank Refrigerators provide consistent temperature range from 0 to 10°C with temperature uniformity of + / - 2°C at 4°C.

Construction: These freezers or refrigerators for blood storage are durable and come with double walled construction. External chamber is made of 304 grades stainless steel and inner chamber is made of corrosion resistant polished stainless steel. CFC free high density polyurethane foam insulation is used for minimizing thermal loss.

Doors:

Doors are lockable and have a magnetic sealing frame that is easy to replace. There is no overhang when the door is open. Door hinged on the right as standard; however this can be changed to the left at later date. Door can be a glass door for easy viewing of samples or solid in construction.

Shelves: The Shelves are adjustable and made of high quality steel wires. These shelves are easy to clean and if required in extra quantity, these can be ordered separately.

Safety Features:

Blood Bank Refrigerators provide safety on work place. These refrigerators can be kept password protected through digital touch keypad control. These units also incorporate audio and visual power failure alarm and a digital alarm for high and low temperature levels.

Environmental Friendly:

Blood Bank Refrigerators feature commercially available CFC-free, HFC refrigerants and CFC-free insulation.

Model: Number of Bags: 30, 58, 66, 165, 312, 432, 624

Blood Bank Refrigerator Specifications:

Temperature: 0 to 10°C

Temperature Uniformity: + / - 2°C at 4°C

Temperature Controller: Digital P.I.D Controller

Display: Dual LCD / LED Display

Alarm: Integrated High / Low Alarm tests

Power Failure Alarm: Yes

Password protection: With touch keypad digital control

Refrigerant: Non-CFC Refrigerant (R134A)
