

Product Name :
Cement Autoclave

Product Code :
NAAY-M39

Description :

Cement Autoclave are made of double walled units. Outer chamber is constructed with thick high grade sheet duly pre-treated with primers and painted with stove enamel or power coated ensuring long lasting and rust proof performance. The inner cylinder is made of heavy gauge welded steel sheet. These cement autoclaves are air insulated from inside and in some cases as per customer requirement mineral glass wool insulation is also provided. These units are equipped with strong locking lid which is made of thick stainless steel plate to provide better safety while operating the machine and mounted on a sturdy supporting frame. The pressure inside is controlled by pressure gauge and spring-loaded safety valve. These units come after passing hard research and testing procedure. To deliver long lasting and durable equipment our cement autoclave units are tested up to 2.5times the normal working pressure.

Features:

- Equipped with wing nut locking system
- High grade spring loaded safety valve of brass
- Fast and reliable accurate results
- Versatile usage
- Equipped with steam stock provision
- Energy Efficient
- Tested on up to 2.5 times the normal working pressure
- Customized Cement Autoclave Models also available
