

Product Name :
Compression Set Test Fixture India

Product Code :
NG325-A

Description :

Compression Set Test Fixture India

Technical Specification :

- As a rubber sample is compressed over time between two flat parallel plates with predefined percentage and kept for a specific time at a certain temperature, it loses its ability to return to its original thickness.
- This loss of resiliency, also called memory or permanent set, characterizes the capability of an elastomeric product to perform over a long period of time.

Description:

- Compression Set Test Fixture
- According: ISO 815, DIN53517 and/or ASTM D395-B
- Precision ground: Stainless-Steel
- Plates: 3
- Spacer bars for type 1 sample (thickness of 12.5 ± 0.5 mm) thickness 9.5 ± 0.02 mm, 12pieces

- Three stable and rugged stainless steel base plates including 2 sets of 6 spacers: LO = 12,5mm mm with 25% deflection
- All part and components made from precision stainless steel: YES
- The tools are double layer and can take up to 16 samples
- Test and calibration protocol: Included
