Product Name :	**Product Code :**
Counters Trainer for Electronics Teaching Labs	BEL-TR-41

Description :

Counters Trainer - Counters Trainer - Synchronous Binary CounterCounters Trainer is a
compact, ready to use digital electronics experiment board. It is useful
for students to get a practical insight into the working of counters.
Counters are undoubtedly the most important part of any digital circuit.
The various applications of a Counter are counting events or time
periods, dividing frequency, addressing, and serving as memory units.

NV6560 has a built in clock source, logic high-low input facility, LEDs
for visual indication of input-output states. Besides this, a +5V DC
adaptor is also provided for power supply.

Stand Alone system

Easy illustration of different types of counters

LEDs for visual indication of inputs and outputs status

SPDT switches for input logic selection e-Manual

e-Manual
