Diesel Engine for Small Car, Electrical Operation

Product Supply Code TechnicalLab0472

DESCRIPTION

Diesel Engine for Small Car, Electrical Operation
This product is a cut-away of a small diesel engine for a car with a on a sturdy stand with wheels. This is a 4-stroke, 4-cylinder in-line configuration engine that allows you to:

• Observe its 120v electronically powered movement at a reduced speed for easy comprehension.

• Differentiate each of the parts, which have been carefully sectioned for training purposes.

• Educate about all separately painted mechanical segments, cross-sections, lubricating circuits, fuel system, cooling system, etc.

• Use it for an extended period due to the many chromium plated and galvanized parts.

SPECIFICATIONS:
• 4 stroke engine; 4 in-line cylinders
• Displacement: 1300 cc
• Indirect injection
• VE Bosch type rotary injection pump
• Overhead camshaft (OHC)
• Distribution through a toothed belt
• Alternator
• Thermostatic valve
• Power: 45 hp.
• Water cooling
• Mounted on stand with wheels
• Operates electrically at 120V
