

Product Name : Differential Voltage Sensor	Product Code : DataNAS-10008
	
Description :	
Differential Voltage Sensor	
Technical Specification :	
<p>The Differential Voltage Probe is the preferred voltage sensor in cases where more than one voltage sensor will be used in the same circuit.</p> <p>The Differential Voltage Probe reports the potential difference between the red and black leads.</p> <p>Explore the basic principles of electricity and measure voltages in low voltage AC and DC circuits.</p> <p>Use multiple Differential Voltage Probes to explore series and parallel circuits.</p>	

With a range of ± 6.0 V, this system is ideal for use in battery & bulb circuits.

Specification:-

Supply voltage: 5 VDC

Input Impedance (to ground): 10 M Ω

Input voltage range: ± 6.0 V

Maximum voltage on any input: ± 10 V

Differential Impedance: >20 M Ω

Resolution: 3.1 mV

Linearity: 0.01%
