

Product Name :

Display and Switches Module for Embedded System Trainers Teaching Labs

Product Code :

EMB-TR-18

Description :

Display and Switches Module - Display and Switches Module Technologies Display and Switches module MC10 is an extension module for Nvis Microcontroller development platforms. The object is to have a clear understanding of how input peripherals are interfaced and controlled with Microcontroller. The object is to connect and program a Microcontroller to display data and for monitoring. Display and Switches module MC10 has input and output terminals for connection of external real world applications

4 x 4 matrix keypad interface

Eight input sensing switch interface

16 x 2 characters LCD interface

Seven segment display interface

PC based programming

Expansion connectors for plug in with Microcontroller unit and prototyping area

Every pin is marked in order to make the study easier

Exhaustive Learning Material
