

Product Name :

Dorry Abrasion Testing Machine For Testing Lab for Aggregate Testing
Lab

Product Code :

NATM-M6

**Description :**

Dorry Abrasion Testing Machine (NATM-M6) for Aggregate Testing - This machine used for determining the resistance of aggregate to wear by abrasion. Two specimen can be mounted simultaneously and then kept loaded by weights against a machined flat circular grinding surface. The grinding disc rotates at 28-30 r.p.m and two funnels release a continuous flow of operation on 230 Volts, Single phase 50 Cycles A.C. Supply fitted with starting switch.
