

Product Name :
Dynamics Of Machine Lab Equipments for Teaching Equipments Lab

Product Code :
LABS-EDU-00138

Description :

Dynamics Of Machine Lab Equipments

The set up consists of a motor driven rotor connected to a
reduction gear box of 40:1 and pulley system through a flexible
coupling. The Governor spindle is driven by a spiral coupling
connected to the gear box output shaft and is supported on ball
bearings. The external governor mechanism can be mounted on
spindle. Speed control unit is provided to regulate speed and
direction of the spindle shaft upto the speed of one revolution per
minute. The set up is provided with standard accessories &
weights to which weights are added. The Governor
can be operated as a motor or portable Governor.
The following range of experiments can be
