

**Product Name :**  
Electronics Kit

**Product Code :**  
NELAB-21-A3005

**Description :**

Electronics Kit

**Technical Specification :**

The kit contains basic voltage sources, series and parallel circuits, voltage divider, thermistor, light dependent resistor, diode circuits, a bias voltage of a diode, light emitting diode, the zener diode, transistor circuits, alarm circuits, capacitor circuits, multi-vibrator circuits, amplifier circuits and basic logic circuits.

Take electronics to the next level with 57 easy to follow activities covering the basics of electronic components and circuits.

This kit is best suited to learners at the Senior Primary level and beyond.

The kit components snap together easily, requiring no soldering and are stored in a sturdy wooden box for safe keeping.
