

Product Name :

Gas Multipoints Engine Chassis with ABS and Hydraulic Power Steering

Product Code :

TechnicalLab0451

Description :

Gas Multipoints Engine Chassis with ABS and Hydraulic Power Steering

This product is an operational trainer mounted on a mobile stand and equipped with heavyduty casters. All of the major components are visible on this complete unit, making it easy to work on and allows you to:

- Perform many NATEF related tasks including: suspension and steering, brakes, electrical and electronic systems, manual drive train, and axles.
- Educate about the front-wheel drive chassis, engine with electric fuel injection, transmission (clutch, gearbox, differential, and axle shafts), front and rear suspension, steering mechanisms, and breaking components.
- Differentiate each of the parts, which have been carefully cross-sectioned for training purposes.
- Use at a reduced operating speed to teach about all of the moving mechanical parts.

SPECIFICATIONS:

- Front chassis with front drive (transversally mounted engine)
- Gasoline powered 4 cylinder engine
- Displacement: 1,200 cc complete of all accessories

- Electronic Injection MPI (Multipoints)
- Electronic Ignition controlled by a single ECU (Engine Control Unit)
- Catalytic Converter with O2 (lambda) Sensor
- Gearbox: 5 forward speeds + reverse + differential
- Hydraulic power steering with double jointed steering column
- 4 Sensor ABS brake system
- Radiator with electric fan
- Front disc brakes
- Rear drum brakes
- Independent front wheel McPherson suspension with oscillating arms
- Working front and rear lighting system controlled by a dashboard
