

Product Name :
Half Shade Polarimeter for Physics Electric Labs

Product Code :
BSC-TR-24

Description :

Half Shade Polarimeter - Sodium vapour lamp light source. Circular scale graduated from 0° to 360° . Extensive operating manual. Half Shade Polarimeter - Sodium vapour lamp light source.

Circular scale

graduated from 0° to 360° .

Extensive operating manual.

Half Shade Polarimeter is a useful apparatus for understanding the concept of polarization. With the help of half shade polarimeter, polarization can be studied as well as analyzed. For better accuracy in determination of specific rotation, half shade polarimeter is used which involves comparing the brightness of two halves in the field of view. The apparatus is based on Biot's Law. When a plane polarized light is passed through an optically active substance, the plane of polarization of light gets rotated. In order to find out the effect of relative rotation between the polaroids on intensity of transmitted light, we are using a half wave plate. Comparing the brightness of the two halves of half wave plate, one can easily find out the optical rotation produced by an optically active substance in solution form

Sodium vapour lamp light source

Adjustable height

Circular scale graduated from 0 to 360

Polarimeter borosilicate glass tube with bubble trapper in the middle

Learning material CD
