

Product Name :
Hay's Bridge Trainer for Electronics Teaching Labs

Product Code :
BEL-TR-27

Description :

Hay's Bridge Trainer - Hay's Bridge Trainer - Hay's Bridge Trainer NV6535 is useful training product for measuring the value of unknown inductance. This product is useful for students to understand the concept and working of A.C. Bridges.

Hay's bridge is a modification of Maxwell's bridge and is suitable for measuring inductance of high Q inductors by comparison with standard variable capacitance. By setting the null point we can evaluate the unknown inductance value.

In-built sine wave generator

In-built null detector with audio amplifier and speaker

Easy illustration of Hay's bridge

e-Manual
