

Product Name :
Hydraulic Ram Pump

Product Code :
NEGEMG141

Description :

Hydraulic Ram Pump

The Hydraulic Ram comprises an acrylic base incorporating pulse and non-return valves and a supply reservoir on a stand which is fed by the Hydraulics Bench. An air vessel above the valve chamber smooths cyclic fluctuations from the ram delivery.

The weights supplied may be applied to the pulse valve to change the closing pressure and hence the operating characteristics.

Experimental Capabilities:

- Establishing flow/pressure characteristics and determining efficiency of the hydraulic ram.

Specifications:

- Pump body manufactured from clear acrylic with stainless steel pulse and non-return valves
- Adjustable acrylic header tank with inlet and outlet hoses
- Outlet hose with variable head arrangement
- Quick release fitting for easy connection to hydraulics bench
- Supplied with weights to load pulse valve
- Supply head: 300 - 700mm variable
- Delivery head: 750 - 1500mm variable.
