

Product Name :
Hydraulic system model

Product Code :
NJC0095

Description :

Hydraulic system model

Technical Specification :

Electric control, oil pump, motor, cylinder, valve manual/ electric, solenoid valve, limit valve, speed control, gauge valve, emergency stop, limit sensor, change valve (2/3 way), coupler

Basic Hydraulics Learning System introduces industry-relevant hydraulic skills while showing how they apply to fundamental hydraulic principles, such as pressure and flow .As an example, after completing this learning system, learners will not only understand concepts like flow rate versus cylinder speed and pressure versus cylinder force, but also be able to operate, install, design, and troubleshoot basic hydraulics for various applications.

The includes gauges, manifolds, cylinders, valves (relief/sequence, pressure reducing, check, directional control), flow meter, and hydraulic motor, as well as a hydraulic power unit, manifold set with shutoff valve. These components are all industrial quality not only to ensure durability, but also to help learners become better prepared for what they will encounter on the job.
