

Product Name :
Hydraulic Trainer Electrohydraulic

Product Code :
TEL0009

Description :

Hydraulic Trainer Electrohydraulic

Technical Specification :

Silent Features

software for simulation of Hydraulic circuits.

- We are manufacturing cylinders for industrial applications. Our cylinders can withstand pressure up to 160 Bar.
- Mobile and self-contained unit, only electrical connections are required.
- Simplicity of operation and designed for amateur use.

- Two pressure relief valves are provided in the system. One is provided inside the tank to increase the safety.
- Hoses can withstand pressure of 188 Bar.
- Test Pressure : 80 Bar ; Operating Pressure : 40 Bar.
- Realistic Industrial circuits are demonstrated.
- Special Bell housing is provided to maintain the Run out between Pump and Motor below 0.020mm.
- Special fixtures used for pipe bending and ferrule fitting arrangement.
- Specially designed front mounting plate.
- System is flushed with very high velocity (4 times the working pressure) by separate oil which maintains class A cleanliness of system.
- Lowest pressure drop in the system to avoid overheating.
- Cylinder are manufactured from precision honed tubes, hardened ground, hard chrome plated piston rods and imported quality seals, Civil Engineering Laboratory Equipments Suppliers, Mechanical Engineering Laboratory Equipments Suppliers

, Engineering Teaching Aids, Models Equipments Theory of Machine Lab Suppliers, Hydraulics Laboratory Equipment and Apparatus
