

Product Name :

IOWA Bearing Value Apparatus For Testing Lab for Soil Testing Lab

Product Code :

P86

Description :

for Soil Testing - For determining the supporting strength of soil and aggregate mixtures which pass the 2mm and do not contain more than 10% sand size material.

The salient features of this apparatus are :-

- 1) The moulds used in this test are very small hence very smaller samples are required which is a great advantage when a large number of testes have to be carried out with a limited quality of soil available. Also when large quantities of soil are available fresh samples can be used for each test.
- 2) Time required this test is very much less than C.B.R. test and thus more number of tests can be carried out.
