

Product Name :
Light Sources for Physics Electric Labs

Product Code :
BSC-TR-28

Description :

Light Sources - Designed considering all safety standards. Provided with a slit mask for different slit-plates. Light Sources - Designed considering all safety standards.

Provided with a slit

mask for different slit-plates.

Light source is essential for all optics system. With a good spectral light source, students can investigate energy levels using spectrometer. In laboratory work generally artificial light sources are used, which are necessary for understanding the behavior of optics phenomena. Nvis light sources are the toughest, most reliable light sources available for the laboratories, providing high intensity spectral light.

Designed by considering all safety standards

Provided with a slit mask for different slit-plates

Holes are provided to exhaust the hot air

Easy to operate

Inbuilt cooling fan is provided for halogen lamp

Learning material CD
