Product Name : Marcet Boiler	Product Code : NEGEMG115
Description :	
Marcet Boiler	
The Marcet Boiler unit is designed to demonstrate the relationship between the pressure and temperature of water during steam generation. Temperatures of up to 200°C are possible for recording the vapour pressure curve. The temperature and pressure can be continuously monitored via a digital temperature indicator and a Bourdon tube pressure gauge. A temperature controller and pressure relief valve are fitted as safety devices and protect the system against overpressure.	
Experimental Capabilities:	
Measurement of Temperature & Pressure To study relationship between Pressure & Temperaure of steam To record vapor pressure curve for water	
Specifications:	
Bourdon tube pressure gauge: 0-15 bar Temperature Controller: 0-200°C Safety valve: 10 bar Heater: 2kW Boiler, stainless steel: 2L
