

Product Name :
Microprocessor Water & Soil Analysis Kit

Product Code :
NAAY-M11

Description :

Microprocessor Water & Soil Analysis Kit - For efficient use of nutrients in the soil, to test the purity of drinking water and for waste water testing, the company has introduced microprocessor Water & Soil Analysis Kit. This is a unique portable instrument for measurement of various parameters i.e. pH, Conductivity, TDS, Salinity, Temperature, Dissolved Oxygen and mV solution. A chargeable sealed lead acid battery is provided within the kit that makes it extremely useful for field and laboratory use. The use of latest micro controller technology makes it reliable, accurate and low power consuming instrument. The instrument has an automatic decimal positioning, auto buffer recognition and polarity indication and low battery indication facility which eliminated manual errors.

FEATURES :

Measures pH, Conductivity, TDS, DO, Salinity, mV & Temperature
Highly Accurate & Stable
User Friendly & Menu Driven Software
16x2 Line Alphanumeric LCD Display
Storage for 90 Samples
Printer Attachment Facility
Mains cum Battery Operated

Address: 6148/6, Guru Nanak Marg, Ambala Cantt, Haryana, India, **Phone:** +91-0171-2643080, 2601773
