

Product Name :

Mitsubishi Gas Engine With Direct Injection - Electrical

Product Code :

TechnicalLab0303

Description :

Mitsubishi Gas Engine With Direct Injection - Electrical

This product is a cut-away of a Mitsubishi gas engine with direct injection. Gas engines having direct injection (fuel inlet in the combustion chamber and not in the air suction duct), have high performances and are designed to comply with the most severe anti-pollution regulations. The engine is mounted on a stand with wheels and operates at 120V; it runs at a reduced speed in order to let the student easily observe and understand the operation of the various mechanical parts.

SPECIFICATIONS:

- 4 in-line cylinders
- Displacement: 1400-2000 cc
- DOHC twin overhead camshaft
- Multi-point electronic injection
- 4 valves per cylinder
- Water cooling
- 12V alternator
- Operates electrically at 120V
- Mounted on a stand with wheels
