Product Name :	**Product Code :**
Multi Interface Module for Embedded System Trainers Teaching Labs	EMB-TR-19

Description :

Multi Interface Module - Multi Interface Module Technologies Multi interface module MC11 is an extension module for Nvis Microcontroller development platforms. The object is to have a clear understanding of how input peripherals are interfaced and controlled with Microcontroller. MC11 has been designed to have a clear understanding of how Stepper Motor is interfaced and controlled with 2 Microcontroller. It also gives a clear understanding of SPI and I C interface bus for data transfer.

Temperature Sensor interface

Stepper Motor interface

I2C EEPROM interface

SPI EEPROM interface

PC based programming

Expansion connectors for plug in with Microcontroller unit and prototyping area

Every pin is marked in order to make the study easier

Exhaustive Learning Material
