

Product Name :
Nitrogen Gas Generators For Testing Lab for Gas Chromatography Lab

Product Code :
NITR-N001

Description :

for Gas Chromatography - Nitrogen Gas Generator - Compact & low noise nitrogen gas generator system based on advanced technologies ideal for lab applications... Purity levels from 99.9% to 99.9995% using two technologies - electrolysis technology with Membrane separation as well as PSA based systems.

Nitrogen Gas Generators are available using the PSA Technology as well as the newer KOH Electrolyte based Membrane Separation Technology. Both the technologies have their distinctive uses with the PSA systems being the industry standard and the newer membrane technology being more widely used now due to the lower prices with development of the technology on a nano scale.

Nitrogen Gas Generators use PSA or Membrane design that ensures that all the Nitrogen Gas Generator are safe, flexible, reliable, and cost effective solutions. Nitrogen Gas Generators have wide variety of industrial and process applications.
