

**Product Name :**  
Oil system model

**Product Code :**  
NJC0089

**Description :**

Oil system model

**Technical Specification :**

Oil lubrication system is used to circulate oil continuously to various moving parts and heavily loaded bearings of any machinery. Oil lubrication system are used in almost every industry to provide preventative maintenance of lubrication systems, by providing an automatic supply of lubrication to machine bearings and other devices needing lubrication. The Lubrication Learning System teaches students the technical skills needed to operate, install, tune, maintain and troubleshoot these vital lubrication systems.

Heavy Duty Industrial Style Components

Steel Tubing Conductors

Fault Insertion in fluid and electrical devices

Mobile Workstation

Interchangeable Component Panels

Student Reference Guide

Includes a series-progressive valve panel, fluid recovery panel, servicing package with hand pump, student learning materials for both theory and lab, and teacher's guide. Additional panels are available to extend the capability of the system.
