

Product Name :
Optical Transducers Trainer for Instrumentation Electric Labs

Product Code :
ITT-TR-07

Description :

Study of Optical Transducer, Optical Transducers Trainer - Optical Transducers play a very important role in industrial and domestic applications. Optical and Temperature Transducers Trainers are unique in design because each covers the study of 4 different types of Transducers. Experiments covering fundamental characteristics of transducers & study of transducer controlled switching/alarm systems can be performed with these trainers. These trainers come with exhaustive manuals covering theory and experimental procedures for conducting experiments.
