

**Product Name :**  
Oscilloscope Trainer & Oscilloscope Lab Kit for Training for Vocational Training and Didactic Labs

**Product Code :**  
CON-008-NE

**Description :**

Equipment for Education, Engineering and Vocational Training - Oscilloscope Trainer & Oscilloscope Lab Kit for Training - Oscilloscope Demonstrator Trainer is specifically designed for the study of working of an oscilloscope in an open form. The Controls are placed actually at the place as they are in the layout schematic. Thus a trainee can easily locate any section, & components in the section and study it thoroughly. The function controls and the adjustment controls are fully accessible to the trainee to verify their effect on the working of the scope. Creation of Faults and rectification of faults are important exercise covered in the experiments. An illustrated Block and Circuit Schematic and the adjustment plan right in front of the trainee's eyes helps him to correlate each operation during the demonstration.
