

Product Name :
Pull-Off Tester DYNA For Testing Lab

Product Code :
NDTE-C10

Description :

Pull-Off Tester DYNA - Testing is carried out directly on the structure. It can be measured on any point of the structure. For the determination of the tension strength it is not necessary to install test devices prior to the casting of the concrete. It is ideal for the evaluation of strength in concrete renovation.

Advantages :

1. Mobile for use in any location
2. Independent of mains supply thanks to easy running crank drive
3. Constant jerk-free load increase
