

Product Name :
Radar Trainer for Communication Teaching Labs

Product Code :
COM-TR-88

Description :

Radar Trainer - Radar Trainer -Radar Trainer is a very useful and realistic classroom training equipment provided with different types of accessories for experimentation and a Windows based software for observation and calculation of different parameters. On-board Test points are provided which enable students to observe the signals on Oscilloscope or PC. The trainer is capable of measuring the Speed of object, Frequency of vibrations and RPM of any fan. Students can also study the properties of different types of material like Metal, Acrylic, Teflon, Bakelite, etc.

Complete hardware and software setup to demonstrate Radar concepts

Signals study on Software / Oscilloscope with the help of test points given on trainer

Object counter provided on trainer

Real time fan RPM measurements and vibrations measurements with the help of tuning forks

Tripod stand provided for height and level matching

LED Indication for Doppler Echo Signal

On board alarm for detected signals
