|---|------------------------------------|
| <b>Product Name :</b><br>Sof Polarizerset for Physics Electric Labs   | <b>Product Code :</b><br>BSC-TR-31 |
|   |                                    |
| <b>Description :</b>  |                                    |
| <p>Sof Polarizerset - Wide Aperture Optics.Accurate and precise arrangement. Sof Polarizerset</p> <p>Set of Polarizers consists of two identical units Polarizer and Analyzer. A polarizer is a device that converts an unpolarized or mixed-polarization beam of electromagnetic waves (e.g. light) into a beam with a single polarization state (usually, a single linear polarization). Polarizers are used in many optical techniques and instruments, and polarizing filters find applications in photography and Liquid Crystal Display technology</p> <p>Wide Aperture Optics</p> <p>Accurate and Precise Arrangement</p> <p>Freely Rotational Pointer</p> <p>Learning material CD</p> |                                    |
