

Product Name :
Sof Polarizerset for Physics Electric Labs

Product Code :
BSC-TR-31

Description :

Sof Polarizerset - Wide Aperture Optics. Accurate and precise arrangement. Sof Polarizerset

Set of Polarizers consists of two identical units Polarizer and Analyzer. A polarizer is a device that converts an unpolarized or mixed-polarization beam of electromagnetic waves (e.g. light) into a beam with a single polarization state (usually, a single linear polarization). Polarizers are used in many optical techniques and instruments, and polarizing filters find applications in photography and Liquid Crystal Display technology

Wide Aperture Optics

Accurate and Precise Arrangement

Freely Rotational Pointer

Learning material CD
