Product Name :	**Product Code :**
Solar Operations and Maintenance	NE-CNC-LAT33

Description :

Solar Operations and Maintenance

Technical Specification :

Solar Operations and Maintenance.

Rising electricity costs and economic pressures have put even more importance on effective management of energy assets. The goal is not just reduced O&M costs, but increased energy production as well. RKINC’s portfolio of distributed generation assets produces energy at average of 103%-105% of expected production.

We are able to offer our clients a single custodian for their assets, providing a fully comprehensive service covering all aspects of solar O&M services. Our proposition includes site optimisation reviews, regular cleaning and ground maintenance, guaranteeing optimal performance and production. We also provide monitoring and reporting services, alongside proactive and reactive maintenance and repairs, to deal quickly and efficiently with any functionality issues. We deliver these propositions while working side-by-side with our clients’ own Asset Management and Service Delivery teams.

RKINC is the pre-eminent provider of solar operations and maintenance (O&M) in India. We provide best-in-class solar O&M services to a variety of clients, including asset owners, managing a diverse portfolio, from multi-megawatt installations homes. Our objective is to ensure that all the sites we maintain are fully optimised: our unparalleled framework and extensive resources allow us to guarantee the performance of our clients' solar PV systems. We form long-term partnerships focused on site performance and efficiency, allowing our clients to secure the returns they expect from their investments.
