

Product Name :
Unconfined Compression Test Machine

Product Code :
Civil Engineering0030

Description :

Unconfined Compression Test Machine

We are Leading Supplier of Unconfined Compression Test Machine in India. We also bulk supply Unconfined Compression Test Machine for laboratory tensors.

Unconfined Compression Test Machine

Features :

The electric strain unconfined compression tester is used to determine un-confined compression strength of cohesive and semi-cohesive soils. The test is used to supply information needed for the design and construction of civil engineering structures.

Technical Specifications of the Electric Strain Unconfined Compression Tester

Lift plate journey per revolution of the wheel : 0.2 mm
stroke of the lift plate : 30 mm
Lifting speed : 1.8mm/min $\pm 15\%$
axial load : 0.6 KN
Diameter of the cylinder : $\varnothing 39.1$
